SOMANATH BHANDARI M

Backend & Full Stack Developer | MCA

+91 9113037050 | Shivamogga, Karnataka somnathjogi20@gmail.com
GitHub: github.com/somnathmbhandari2002 LinkedIn: linkedin.com/in/somnath-bhandari-m-977630298

PROFESSIONAL SUMMARY

MCA graduate and full-time Backend Developer at Snipe Tech (Current) with 1.5+ years of hands-on experience building scalable APIs, AI-integrated systems, and full-stack applications. Expertise in Python, FastAPI, and modern backend architecture. Strong track record shipping production-ready microservices, implementing real-time AI solutions, and deploying systems on AWS. Passionate about clean code, system design, and solving complex backend challenges.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, HTML, CSS
- **Backend & Frameworks:** FastAPI, Django, RESTful APIs, Microservices Architecture
- **Databases & ORMs:** SQL (MySQL), MongoDB Atlas (NoSQL), Alembic (migrations)
- **Frontend & Full Stack:** React.js, JavaScript, HTML/CSS, Full-stack development
- **AI/ML & Computer Vision:** FastAPI model integration, OpenCV, CNN architectures (ResNet, EfficientNet, DenseNet)
- **DevOps & Deployment:** AWS (S3), Render, Netlify, Git, Bitbucket, Docker
- **Tools & Platforms:** Postman, VS Code, PyCharm, Hugging Face, Claude, Cursor

PROFESSIONAL EXPERIENCE

Full-Time Backend Developer | *Snipe Tech Pvt. Ltd., Bangalore | Jan 2025 – Present*

- Designed and deployed scalable FastAPI backend services for AI-driven interview automation platform with 10,000+ concurrent users
- Integrated advanced ML models (ResNet, EfficientNet, DenseNet) for brain & leukemia cancer detection using FastAPI and MongoDB
- Built AI-powered cheating detection system using audio-visual fusion, facial emotion recognition, and gaze tracking (Published in IRJMETS)
- Developed secure authentication, real-time data APIs, and optimized database queries for 40% performance improvement
- Managed end-to-end API design, testing (Postman), and deployment using Render and AWS

AI Research & Development Intern | *Snipe Tech Pvt. Ltd., Bangalore | Jan 2024 – Dec 2024*

- Built RESTful APIs using FastAPI for a2zmytest.com SaaS platform handling authentication, assessments, and secure data storage
- Implemented cheating detection using OpenCV, computer vision, and machine learning algorithms
- Collaborated with cross-functional teams on scalable microservices architecture for AI-driven applications

KEY PROJECTS

AI-Powered E-Learning Platform (Full-Stack) | 2024–2025

- Built scalable learning platform using FastAPI (Python), MongoDB Atlas, and React with 5,000+ student users

- Integrated custom AI Voice Assistant for real-time student query resolution and Text-to-Speech for PDF study materials
- Deployed on Render (backend) and Netlify (frontend) with automated test evaluation and scoring system

OncoVision – AI Cancer Detection Platform | 2024

- Developed FastAPI backend for image processing, model integration, and real-time cancer detection predictions
- Built scientist dashboard using React.js for AI result visualization and patient insights

A2ZMyTest – SaaS Assessment Platform | 2024

- Led full-stack development from architecture to deployment with FastAPI, React, SQL, and Alembic
- Implemented JWT authentication, role-based access, and optimized database queries for production performance

EDUCATION

Master of Computer Applications (MCA) | *AMC Engineering College, Bangalore | 2023–2025*
Best Research Paper Award (2025) – National Conference for AI-Powered Cheating Detection System

Bachelor of Computer Applications (BCA) | *Sir M.V. Govt. Science College, Bhadravathi | 2020–2023*

RESEARCH & RECOGNITION

- **Published:** "AI-Based Automated Interview Process" (IJMRSET, 2024) and "AI-Powered Cheating Detection System" (IRJMETS, 2024)
- **Awards:** Best Research Paper – National Conference, AMC Engineering College (2025)
